Groundwater Management Plan

In an effort to better manage the City's finite water resources, the Corona Department of Water and Power has contracted with AKM Consulting Engineers and Todd Engineering to prepare an Assembly Bill 3030 compliant Groundwater Management Plan (GWMP).

There will be an informational meeting held on December 11, 2007 from 2:00 p.m. to 4:00 p.m. at Corona City Hall, 400 South Vicentia Ave., Corona, in the City Council Chambers. The meeting will include a PowerPoint presentation outlining the groundwater basins (Temescal, Bedford, and Coldwater) and the projects the City may implement to manage this asset. All interested parties are welcome to attend and we look forward to meeting with you. The PowerPoint presentation is also available on our website at www.coronautilities.org.

If you have any questions or require additional information, please call Mr. Matthew Bates, Utility Engineer at (951) 279-3692.
